

The British-Estonian Chamber of Commerce is calling on Estonian tech businesses to join a trade mission to Leeds Digital Festival and London in April.

The BECC is offering participants an opportunity to showcase their expertise to the UK market, engage with business and local government leaders from the North and London and expand their business network.

The trade mission takes place in Leeds from 16.04-18.04 and in London from 19.04-20.04. Participants are expected to arrive to Leeds on the evening of the 16th for a private dinner with senior leaders from the North.

Expected participants have a financial technology or cyber security focus and are interested in doing business in the UK market.
