

e-Estonia's building blocks programme

02.12.2019

Day 1: e-Estonia's building blocks, pt. 1

<p>enter e-Estonia (9 – 10.00)</p>	<p>peek inside the e-state <i>with Florian Marcus, e-Estonia Briefing Centre</i></p> <p>Estonians are pathfinders, who have built an efficient, secure and transparent ecosystem that saves time and money. e-Estonia invites you to follow the digital journey. The initial part introduces and demonstrates the underlying mechanisms involved in digitizing a society, an overview of the main challenges and policies, an understanding of the infrastructure, e-solutions and services.</p>
<p>fintech (10.15 – 11.00)</p>	<p>finance estonia <i>with Kaido Saar, Estonian FinTech Cluster (+)</i></p> <p>Modern high-level technology is fundamental basis for today's information society and financial world. Estonian financial technology experts have over 20 years of greenfield development experience having established a high-level functional financial system from scratch. Financial IT systems and services in Estonia are highly innovative combined with user friendliness.</p>
<p>e-Identity (11.15-12.00)</p>	<p>the key to e-Estonia <i>with Georg Nikolajevski, SK ID Solutions (+)</i></p> <p>SK has issued certificates for ID-cards issued by the Police and Border Guard Board (PPA) since 2002. Together with Cybernetica SK ID Solutions also developed Smart ID, the new generation electronic identity to use conveniently on smart devices, while still keeping high level of security. Smart-ID is the easiest, fastest and safest way to authenticate customers online.</p>
<p>(12.15 – 13.30)</p>	<p>lunch</p>

either provided by catering company or restaurant nearby.

e-Identity (13.45-14.30)	<p>the key to e-Estonia II with Kevin Tammearu, Cybernetica, Split Key Team (+)</p> <p>SplitKey Authentication and Digital Signature Platform is a next generation digital ID technology. The platform turns end-user mobile devices into secure authentication devices, equipping online service providers with a reliable and secure end user access management tool. The platform also enables end-users to digitally sign documents in accordance with European Union regulation (eIDAS directive).</p>
e-identity meeting start-ups (14.30-15.15)	<p>online identity verification with superpowers with Triin Uustalu, Veriff (+)</p> <p>Veriff builds up trust on the internet. Whether it's someone you're offering your home on Airbnb, the driver you're hailing on Uber or whom you're buying from on Amazon, simply by using their identity document and a camera Veriff verifies the identity of these people in seconds. So instead of having to visit a bank to open an account, Veriff lets you do so from your own home, or even on the go.</p>
business & finance (15.30 – 16.15)	<p>good-bye, third-party payment providers! with Jane Aavik, EveryPay (+)</p> <p>EveryPay is a fully cloud-based payment gateway platform and leading payment provider for acquirers. With EveryPay banks and acquirers can offer innovative digital payment solutions as part of the acquiring offering. Clients do not have to seek solutions from third-party payment providers, and this also leads to increased revenues.</p>
business and finance II (16.30 – 17.15)	<p>one-click legal entity verification with Neeme Org, Entify (+)</p> <p>Entify cuts international customer on-boarding times from weeks to minutes with a fully automated legal entity verification. Comply with anti-money laundering regulations and prevent financial fraud using our complete one-click solution. Find background information about customers and partners from anywhere in the world and only make informed business decisions.</p>

03.12.2019

Day 2: e-Estonia building blocks, pt. 2

Cybersecurity (9 – 9.45)	<p>how to keep e-Estonia safe? with Silver Kelk, Guardtime (+)</p> <p>KSI is a blockchain technology designed in Estonia and used globally to make sure networks, systems and data are free of compromise, all while retaining 100% data privacy. Guardtime's KSI blockchain technology, governments and enterprise enable complete auditability, transparency and attribution for their systems, networks and data as everything that happens in their digital environment can be independently verified, at massive scale, in real time.</p>
business & finance III	<p>white label banking software</p>

e-Estonia Briefing Centre

<p>(10-10.45)</p>	<p>with Kristjan Järvan, pocosys (+)</p> <p>Pocosys has a fully ready banking as a service operating model. Starting a banking business is costly and time consuming. Pocosys has invested into the establishment of a full set of required legal and operational processes. Pocosys provides banking as a service under payment institution Pocopay AS, which enables them to issue their own banking IBAN accounts and to be an indirect participant in the SEPA system in cooperation with Lithuanian central bank.</p>
<p>business & finance IV (10.45 – 11.30)</p>	<p>direct carrier billing</p> <p>with Taavi Krusell, Fortumo (+)</p> <p>Fortumo provides its merchants with carrier billing, a payment solution that is available by default to any phone owner. Payments can be done on mobile phones or desktop and completed in a few seconds - the purchases are charged to the user's phone bill or deducted from their prepaid balance. For local governments Fortumo becomes relevant, when they local municipalities are offering ride-sharing, rentals and public transportation services.</p>
<p>business and finance V (11.45 – 12.30)</p>	<p>stock exchange</p> <p>with Ott Raidla Nasdaq Tallinn (+)</p> <p>Nasdaq Tallinn is the only regulated secondary securities market in Estonia. It maintains regulated, open and efficient market infrastructure. The exchange provides companies with an efficient channel to raise capital and to facilitate the participation of institutional and private investors in primary offerings and secondary trading.</p>
